

What an amazing day!  
Seminar on Thyroid Disease, Vaccination and Nutrition  
with Dr Jean Dodds/USA  
by Brigitte Mordan-Grimm

Welcoming over 130 participants from 6 different countries, the Eurasier Society UK held a large, international seminar at Stoneleigh Park on Hypothyroidism, Vaccination and Nutrition by world-renowned US expert Dr Jean Dodds. We also had the benefit of a short presentation by Dr Lorna Kennedy, a UK-based scientist from the University of Manchester on the genetics of thyroid disease in dogs and the likelihood of the availability of a genetic test for it. It was an inspiring and highly informative day. A big 'Thank You' to Junior Hudson, the Eurasier Health Coordinator, for putting so much work into organizing this event, and to all the volunteers who helped to run it so smoothly.

Some of the written feedback received: "Thank you for a brilliant day yesterday. My head was spinning full of information by the end! I was really pleased I

came, it was very well organised with a lovely buffet and very friendly people." JA DipCAPBT (COAPE)

" I am writing to say thank you to the Eurasier Society for organizing the Dr Jean Dodds seminar yesterday. I attended along with 4 other members from our breed and without exception we were all enthralled with the information that this amazing lady brought to us. Also thank you for the lovely lunch and the continuously available drinks etc., all of which were very much appreciated. It is the most expensive seminar I have ever paid for but I must say it was worth every penny and should you be inviting Dr Dodds to the UK again in the future (I know I speak for all of us) we would love to have the opportunity to attend. Thank you again to you and the Eurasier Society for a most informative day." MS
